Studying Linguistics website

Sprachwissenschaftliches Seminar

GEORG-AUGUST-UNIVERSITÄT
GÖTTINGEN

About Linguistics	Propaedeutics	Techniques	Perspectives
 interest	 newcomers	 students	 graduates
			
what is linguistics, what can we learn about the nature of language, its role in communication, the world's languages, language and cognition.	concepts of the scientific jargon or basic concepts of grammar which you may not remember from school but do not want to ask - thinking that your lecturers take them for granted.	techniques for creating a study, conducting a data collection, designing an oral presentation, outlining the findings in a poster, submitting an abstract, writing a scientific paper.	what do people with a qualification in linguistics do in life? Perspectives, possibilities, ideas, experiences about life after studying linguistics, in the academia and in the world.
